

# ALCUMUS SAFESUPPLIER: DEMONSTRATE YOUR COMMITMENT TO SUSTAINABILITY

## SAFESUPPLIER WILL HELP YOU:

- Demonstrate your commitment to quality practices and processes
- Show your sustainability proficiency against competitors
- Improve your compliance through verification
- Inspire confidence and strengthen your relationship with your client
- Help to reduce the risk of incidents occurring for your client, such as: physical injuries, reduced productivity, fines/investigations or damaged business reputation.

## OVERVIEW

Alcumus SafeSupplier provides suppliers with sustainability verification, tailored to industry standards and specific work activities. Alcumus risk experts can help identify gaps in verification by assessing suppliers against legislative requirements and industry best practice requirements. With expert feedback and guidance, Alcumus SafeSupplier and our team of risk management professionals provide assessments and verification to help ensure suppliers are compliant and ready to work.

With the Alcumus SafeSupplier sustainability verification Badge, suppliers are able to demonstrate their commitment to safety and sustainability to clients, giving them an edge over the competition. This will help create more opportunities to grow their business and connect with more clients.

## SOLVING YOUR SUSTAINABILITY CHALLENGES

Alcumus SafeSupplier supports suppliers by helping them:

- Put safety and sustainability first and prove their due diligence in meeting compliance standards.
- Streamline compliance and centralize all documentation and information in one cloud-based solution.
- Gain more work opportunities and exposure to hiring clients within our client database.
- Rest easy, knowing that a team of risk mitigation experts are there to answer questions and provide guidance.

## THE POWER OF SAFESUPPLIER

Alcumus SafeSupplier allows suppliers to play a strong role in creating a safe work environment, with sustainability verification that shows a dedication to best practice. The most common supplier use cases include:

- **Sustainability Verification:**  
Supplier sustainability policies and procedures are reviewed to ensure suppliers meet legislative and industry best practice standards to reduce risk in client supply chains.
- **Document management and compliance:**  
Digitize and centralize all documents in an easily accessible platform, to showcase compliance at any time.
- **Visibility to hiring clients:**  
Grow your business by making it visible to clients looking for workers, based on skills, competencies, safety and sustainability verification.

## KEY BENEFITS

With a solution dedicated to verifying suppliers to sustainability best practice standards, suppliers can identify gaps found in their documentation and take the necessary steps to fulfill them, helping to relieve aspects of the verification process.

Alcumus SafeSupplier can help suppliers:

- **Make sustainability a priority:**  
Suppliers can show all documentation is compliant with sustainability legislation and industry best practice standards.
- **Receive ongoing support and resources to receive verification:**  
Our team of risk mitigation experts identify missing elements needed for verification, keep suppliers up to date of any industry changes, and provide expert feedback, as well as links to expert guidance and templates to implement best practice procedures.
- **Demonstrate commitment to quality practices and processes :**  
With the help of our verification team, suppliers can learn if the information they have submitted in questionnaires is correct and receive feedback on gaps in specific areas.
- **Connect with clients:**  
Suppliers are easily searchable within the Alcumus SafeSupplier database, granting them more exposure to clients within various industries including facilities and property management, manufacturing, food services, construction, and more.
- **Access exclusive Member Benefits to help with the everyday running of your business:**  
Access discounts of up to 20% on Alcumus products including UKAS accredited ISO certification, HR and H&S consultancy, and Chemical Management. Plus, enjoy 10% off at TradePoint and B&Q for your employees

## KEY PLAYERS

### Suppliers

Save time and reduce the burden of verifying your ethical, environmental and financial credentials, by relying on a team of risk experts to ensure best practice and industry standards are always met.

## WHAT MAKES US DIFFERENT

Alcumus SafeSupplier simplifies the sustainability verification process by guiding suppliers along a step-by-step process, with the help of a dedicated team of experts:

### Step 1:

Suppliers register online and provide basic information to set up their account.

### Step 2:

Suppliers complete their supplier profile and provide responses that help customise the assessment so it's specific to their business, the work they do, and where they do it.

### Step 3:

Fill out a customised questionnaire that is generated based on the supplier profile. They will be asked to upload supporting documentation based on legislative requirements, trade qualifications, insurances, and industry best practice standards.

### Step 4:

Within two weeks, the team of risk mitigation experts will assess the information to legislative standards and will respond to the supplier.

### Step 5:

When the assessment is complete, a risk mitigation expert will be in touch to confirm that the verification has been issued. If more information is required, support will be provided to the supplier.

### Step 6:

Suppliers receive their Alcumus SafeSupplier verification, granting them verified status and more opportunities to meet best practice sustainability standards, achieve compliance, and grow their business.
